PROFESSIONAL SUMMARY

Motivated Computer Science graduate transitioning into Full Stack Web Development, with hands-on experience in building responsive and scalable web applications using the MERN stack. Proficient in MERN, with strong knowledge of REST APIs, database management, and modern frontend technologies. Combining professional experience in administration with technical expertise, problem-solving skills, and a passion for developing innovative software solutions.

SKILLS

JavaScript Python MERN Postman MYSQL MUI Figma Netlify Vercel

EXPERIENCE

Admin Jotech Technical Services CO LLC	July 2024- Present DUBAI, UAE
- Managed daily administrative operations, maintained records, and coordinated schedules to ensure smooth office workflow. - Handled documentation, data entry, and correspondence while supporting efficient business operations. - Organized office activities, maintained confidential files, and prepared reports for management review. - Coordinated meetings, managed internal communications, and maintained accurate administrative records.	

PROJECTS

Real-Time News Application (https://ancnews.netlify.app)	2026-04-10 - 2026-04-18
Built a full-stack dynamic news platform featuring real-time data fetching and a centralized content management system. Managed database schemas in MongoDB to ensure efficient storage and retrieval of daily news articles.	
Invoice Builder Pro (invoicebuilderpro.netlify.app)	2026-03-23 - 2026-03-24
Designed a functional productivity tool allowing users to generate professional invoices with dynamic calculation logic. Utilized Tailwind CSS for a utility-first styling approach, significantly reducing the CSS bundle size and improving load times.	
Movie Review Project (moviereviewproj.netlify.app)	2026-03-24 - 2026-03-25
Integrated external movie databases via REST APIs to provide users with live film data, ratings, and reviews. Implemented client-side routing and state management to create a seamless, single-page application (SPA) experience.	
Alaura (alaura.in)	2026-01-02 - 2026-01-12
Developed a live corporate presence featuring a component-based architecture designed for long-term scalability and brand alignment. Optimized front-end performance, resulting in a clean, professional user interface and smooth navigation.	
New Modern Computers	2025-11-10 - 2025-11-20
Architected and deployed a high-performance commercial website for an IT hardware retailer, ensuring 100% responsiveness across mobile and desktop devices. Engineered a modular library of reusable UI components to streamline future updates and maintain design consistency.
